

HOUSEHOLD LINE

WINDOW NETS

White or black weatherproof net that can be fixed into the window frame by a self-adhesive zip. We offer nets in three sizes: 90x150 cm, 130x150 cm, 180x150 cm. Protection against annoying insects such as flies, mosquitoes, moths, spiders and wasps. Net can be easily removed and reset for washing (30° C) or during winter.

GARDEN LINE

FLORABAND - Glue arrows for flower protection

Set of 5 yellow arrows that are glued together. The adhesive arrows are stuck to the soil nearby plants. The pests are attracted by the yellow colour of the arrows.

ARBOBAND - Plant and tree protection glue trap

Set of 5 boards that are glued together as FloraBand. The glue traps are hung with the string or hook nearby the plant or directly onto the plants or trees. The traps can be used all inside, in green-houses and outside. The pests are attracted by the colour of the boards. We offer them in yellow, white or blue colour.

FRUTABAND - Glue strips for protection of fruit trees against creeping pests

Two pieces of strips, each of them consists of two stripes that are glued together. The pack contains 4 glued strips sized 540x150 mm. The trap creates a barrier that does not allow creeping insects to come in the tree-top and damage fruits.

VERMIFIX - Glue for tree and plant protection in cup or tube

The special glue developed for the tree protection against creeping insects. It is applied on a tree trunk to create a compact glue strip, 0,6 - 0,8 mm thick that does not allow creeping insects to come to the tree-top and damage fruits.

WASP TRAP - Bottle

The trap protects against intrusive insects in gardens, balconies, gazebos and anywhere those uninvited "guests" are buzzing around. It works without chemicals. As a lure can be applied - fruit syrup, juice or other sweet, preferably fermenting beverages.

GARDEN LINE

WASP TRAP - Holder to the PET bottle

The trap protects against intrusive insects in gardens, balconies, gazebos and so on. It works without chemicals. As a lure can be applied - fruit syrup, juice or other sweet, preferably fermenting beverages.

TRAP FOR MOLES AND VOLES

The galvanized and the black coated trap is based on the principle of the jaw pliers where the strong spring presses them together. There is also a safety trigger in the middle of the jaw pliers. Moles and voles regularly clean their tunnels. The trap is activated and catches them.

HUMANE MOLE AND VOLE TRAP

A humane tube trap for moles and voles captures the mole alive so it may be transported elsewhere. The trap is made of high quality and solid plastic, there are used zinc plated flaps without surface treatment. The product can be used over again.

NEWS

GRAFTING WAX - For grafting and tree wound treatment in cup or tube

Convenient sealant with addition of beeswax is for grafting and treating tree wounds, which provides a barrier that prevents moisture loss. "A tree balm" helps trees to recover from pruning wounds or tree damage or one year old scion wood.

FORMITOX EXTRA - A bait for ants

Formitox extra effectively exterminates and gets rid of all kinds of ants. Ants often enter buildings in search of food and water, warmth and shelter. The formulation attracts ants quickly and it is fast acting. After the ants feed on the bait, the insects die.

VERMIFIX - Spray glue for tree & plant protection

The special glue developed for the tree protection against creeping insects and for the preparation of various glue traps. The glue in spray is efficient at places where bands for tree and plant protection cannot be used.

Papírna Moudrý, s.r.o is leading European pest control manufacturer, continuing the long tradition of flypaper production and production of poison free and environmentally friendly products against insects and rodents. Our family company was founded in 1991 and later we became one of the biggest flypaper manufacturers in the world. Actually we have around 60-100 workers in two shifts and we distribute our products into 45 countries around the world. You can find us in Židlochovice, the south east of the Czech Republic.

HOUSEHOLD LINE

ECOSTRIPE ATTRACTIVE - Flycatcher

Double sided adhesive paper strip with attractant guaranteeing efficient trapping of houseflies (*Musca domestica*).

VETROBAND - Window flycatcher

One sided adhesive strip with attractant for all kind of insect flying on windows, specially house flies and common fruit flies. The trap has a red tape on the reverse side to be fixed onto a window.

FLY STICK - Handy trap for fruit flies and house flies

A rigid cylinder fly trap with glue and attractant (no chemicals added). The Fly Stick is a suitable alternative to the standard roll type flypaper applicable for food handling areas. FS catches fruit flies, house flies, mosquitoes, gnats and other flying insects.

FEROKAP - Pheromone adhesive tape for monitoring food moths

Double sided adhesive strip containing pheromone which is specifically effective on food moth males of genera *Ephestiaealutella*, *Ephestia kuehniella*, *Ephestia cautella* and *Plodia interpunctella*. It contains attractant which guarantees efficient trapping of the housefly too.

FEROBAND - Pheromone adhesive strip for monitoring food moths

One sided adhesive strip that contains pheromone specifically effective for catching food moths males of genera *Ephestia elutella*, *Ephestia kuehniella*, *Ephestia cautella* and *Plodia interpunctella*.

DRESSBAND - Pheromone adhesive strip for monitoring clothes moths

Cardboard strip folded into a triangular shape - the inside surfaces are coated with a non-toxic and environmentally safe pheromone glue which efficiently catches and holds cloth moth males of *Tineola bisselliella*. Each trap is effective up to 3 months.

HOUSEHOLD LINE

SILVERBAND - Trap for Silverfish

Trap folded into a triangular shape - the inside surfaces are coated with a non-toxic and environmentally safe glue which efficiently catches and holds silverfishes. (*Lepisma Saccharina*).

STABLEBAND - Flytrap for use in stables and cowsheds

One sided adhesive band 0,3 m wide and 10 m long wrapped into a roll of size 300x55 mm. The roll can be hung up easily by the metal hook at a suitable place. The trap is effective for house flies (*Musca domestica*) and other kinds of flies that can be found in stables and cowsheds.

INSECTBAND - Trap for cockroaches and creeping insects

InsectBand can be used at places where cockroaches (*Blatella germanica*) and related insects make an unwelcome appearance - in kitchens, dining rooms, storerooms and others.

RATRIP - Glue for rodents and insects

The glue is used for catching mice, rats and insects. While handling spread the glue on a non-absorbing flat material as carton, plastic foil, wooden board etc. It is necessary to make a flat layer of the glue sized 20x20 cm. Some suitable bait can be added onto the glue layer.

RATABOOK - Glue board for catching insects and rodents

Extremely effective, not toxic, poison free and eco friendly sticky trap in the shape of a book for trapping crawling insects and rodents. You can use it in many places - homes, kitchens, cafeterias, stores, stables, warehouses factories, shops, HACCP etc.

RATABAND - glue board for catching insects and rodents

Extremely effective, not toxic, poison free and eco friendly sticky trap for trapping of crawling insects and rodents. You can increase the attractiveness of the trap by adding appropriate bait like a nut, cheese, bacon, etc.

HOUSEHOLD LINE

WOODEN MOUSE AND RAT TRAP - plywood or beech wood base

Standard traditional wooden mouse/rat trap. It has a small flat wooden base, a spring trap and wire fastenings. Use cheese, salami, bacon, nuts or other sweet smelling food as a bait. Set the trap after the bait is applied. The trap should be placed where mice or rats can occur, but out of reach of children and pets.

PLASTIC MOUSE TRAP

This lightweight snapping mousetrap consists of a set of plastic jaws operated by the coiled spring and triggering mechanism inside the jaws, where the bait is held. It is easy to draw the trap and apply a bait. The trigger snaps the jaws shut, killing the rodent. The trap should be placed where mice can appear, but out of the reach of children and pets.

METAL MOUSE/RAT TRAP

Standard traditional spring mouse/rat trap with jagged edge and heavy duty metal base and spring. Use cheese, salami, bacon, nuts or other sweet smelling food as a bait. Set the trap after the bait is applied. The trap should be placed where mice or rats can occur, but out of reach of children and pets.

HOUSE-SHAPED MOUSE TRAP

This is a zinc plated wire cage trap. It is designed to catch mice or other small rodents alive. Traps should be placed where rodents are likely, but out of the reach of children and pets. Mice can easily detect the smell of humans, so wear gloves when handling the trap or putting some bait inside.

MOUSE TRAP METAL - black extra easy

This is a jaw spring mousetrap made of metal. Insert a suitable bait, then stretch the trap and secure it. Cheese, sausage, bacon, nuts or even sweet smelling foods can be used as a perfect bait. Good trap placement is an essential step for effective use of mouse traps. Inspect first to determine the activity of the mice.

FLYSWATTERS

Plastic flyswatter in five options - yellow, red, green, blue and black. Our flyswatters have a time-proved shape and they are made from quality plastic materials specially between the swatting part and the handle.
