Glue developed for the tree protection against creeping insects. It creates effective barrier against creeping insects that does not allow them to come in the tree-top and damage fruits.

WASP TRAP - holder to the PET bottle

The trap protects against intrusive insects in gardens, balconies, gazebos and so on. It works without chemicals. As a lure can be applied - fruit syrup, juice or other sweet, preferably fermenting beverages.

GARDEN LINE

WASP TRAP - bottle

The trap protects against intrusive insects in gardens, balconies, gazebos and so on. It works without chemicals. As a lure can be applied - fruit syrup, juice or other sweet, preferably fermenting beverages.

SLUG TRAP - for catching slugs and snails

The trap consists of a small plastic container with easily removable lid. Using beer or yeast water as bait will attract snails or slugs effectively.

NEWS

FORMITOX – a bait for ants - sachet/container

Powder effectively exterminates and gets rid of all kinds of ants. Ants often enter buildings in search of food and water, warmth and shelter. The formulation attracts ants quickly and it is fast acting. After the ants feed on the bait, the insects die.

VERMIFIX - Spray glue for plant and tree protection

The special glue developed for the tree protection against creeping insects and for the preparation of various glue traps. The glue is non-phytotoxic (not harmful for plants) and can be safely used directly onto trees and plants. The glue is registered and certificated with relevant authorities.

GRAFTING WAX - cup / tube

Convenient sealant with addition of beeswax is for grafting and treating tree wounds, which provides a barrier that prevents moisture loss. "A tree balm" helps trees to recover from pruning wounds or tree damage or one year old scion wood.

Papírna Moudrý, s.r.o. is a leading pest control manufacturer.

The company has successfully continued the long tradition of production of fly ribbons and glue traps in the region of South Moravia. Our family business was founded in 1991 and over time has become one of the largest producers of flytraps in the world. All our adhesives traps are poison-free and environmentally friendly.

We offer comprehensive solutions for households and businesses who fight with troublesome insects and rodents. We have also expanded our portfolio with tree and plant protection products for orchards and gardeners.

The company employs up to 100 workers in two shifts during the season. We distribute our products to 40 countries around the world. You can find us in Židlochovice, located in the southeast of the Czech Republic.
